SUMMARY

Software Engineer with 3+ years of experience building scalable, high-performance web applications in the banking and media domains. Specialized in **React.js** and **Redux**, with hands-on experience in **micro frontend architectures** and large-scale **Retail Internet Banking platforms**. Proven ability to deliver end-to-end solutions, including CMS development and real-time video wall systems, with a strong focus on performance, reliability, and user experience.

SKILLS

- **Frontend:** React.js, Redux, JavaScript, HTML, CSS, Bootstrap, MUI
- **Backend:** Node.js, MongoDB
- **Architecture & Concepts:** Micro Frontends, REST API Integration, Component-Based Design
- **Tools & Platforms:** Git, Postman, BrowserStack, JIRA, DBVisualizer
- **Familiar:** Angular, Python

EXPERIENCE

1. FIS Global, Bengaluru - Professional Services Engineer II

Jan 2025 – Present

(Transitioned to Cognizant payroll from Apr 2026 as part of organizational restructuring)

Retail Internet Banking Platform (Micro Frontend Architecture)

- Developed and delivered frontend features for a **large-scale Retail Internet Banking platform** using micro frontend architecture, enabling modular and scalable application development
- Built and maintained **reusable UI components** using React.js, Redux, and MUI across a platform with **150+ features**
- Took ownership of debugging and resolving **high-priority production issues and release blockers**, contributing to improved stability and smoother production deployments
- Collaborated on **multiple production deployments**, ensuring smooth rollouts with minimal downtime
- Worked closely with backend and integration teams to ensure seamless interaction with **Profile Core Banking System (CBS)**

Profile CBS Upgrade (Struts to Spring Boot)

- Contributed to the **modernization of a core banking system** for a UK-based bank, upgrading legacy Struts-based modules to Spring Boot
 - Implemented and validated **customizations aligned with bank-specific requirements**, ensuring compatibility with existing workflows
 - Gained working knowledge of **core banking system architecture and financial domain workflows**
 - Collaborated with cross-functional teams to support **system upgrades and integration efforts**
-

2. Riversilica, Bengaluru - Software Engineer

Nov 2022 – Jan 2025

CMS Migration (Angular to React)

- Migrated a large-scale OTT CMS from **Angular to React.js**, improving maintainability and frontend performance
- Built responsive UI components for a platform supporting **Web, Android, iOS, and TV applications**
- **Tech:** React.js, Redux, JavaScript, Bootstrap

Video Wall System

- Designed and developed a **real-time video wall system** on Linux, monitoring **300+ live channels** with audio level tracking
- Built **20 video grids with 16 channels each** and delivered the solution **end-to-end (PoC → Production)** independently
- **Tech:** Python, Kivy | **Team Size:** 1

Streamer

- Built a **video streaming and packaging platform** supporting **HLS, DASH, and DRM**
- Developed scalable backend APIs using **Node.js and MongoDB**, alongside frontend features using React.js
- **Tech:** React.js, Redux, Node.js, MongoDB

EDUCATION

City Engineering College - Bachelor of Engineering

CGPA - 7.8

AUGUST 2018 - AUGUST 2022

CERTIFICATIONS

Meta - Basics of React.

VOLUNTARY SERVICES

GirlUp Gleam, United Nations Foundation - Content Writer

JULY 2020 - SEPTEMBER 2022
