SUMMARY

Frontend-focused Software Engineer with **3+ years** of experience building scalable, high-performance web applications across banking and media domains. Specialized in **React.js**, **Redux**, and **microfrontend architectures**, with experience delivering enterprise-scale **banking platforms**, **OTT systems**, and **real-time monitoring solutions**. Experienced in reusable component design, production issue resolution, and cross-functional collaboration, with working knowledge of **Node.js** and **MongoDB**.

SKILLS

- **Frontend:** React.js, Redux, JavaScript, HTML, CSS, Bootstrap, MUI, Jest, RTL
- **Backend:** Node.js, MongoDB
- **Architecture & Concepts:** Micro Frontends, REST API Integration, Component-Based Design
- **Tools & Platforms:** Git, Postman, BrowserStack, JIRA, DBVisualizer
- **Familiar:** Angular, Python, TypeScript

EXPERIENCE

1. FIS Global, Bengaluru - Professional Services Engineer II

Jan 2025 – Present

(Transitioned to **Cognizant** payroll from Apr-2026 as part of organizational restructuring)

Retail Internet Banking Platform (microfrontend architecture)

- Developed and delivered scalable frontend features for a **large-scale Retail Internet Banking platform** using **microfrontend** architecture, enabling modular and independently deployable applications
- Built and maintained reusable UI components using React.js, Redux, and MUI across a platform supporting **150+ banking features** and workflows
- Took ownership of debugging and resolving high-priority production issues and release blockers, improving application stability and deployment reliability
- Collaborated on multiple production deployments and release activities, ensuring smooth rollouts with minimal downtime
- Worked closely with backend and integration teams to ensure seamless integration with Profile Core Banking System (CBS)

Profile CBS Upgrade

- Contributed to the modernization of a core banking system for a UK-based bank by supporting migration of legacy **Struts-based modules to Spring Boot**
- Implemented and validated bank-specific customizations while ensuring compatibility with existing workflows and integrations
- Gained working knowledge of core banking architecture, financial workflows, and enterprise banking integrations

2. Riversilica, Bengaluru - Software Engineer

Nov 2022 – Jan 2025

CMS Migration (Angular to React)

- Worked on a **Content Management System (CMS)**, part of an OTT platform that **integrates Webapp, Android, iOS and TV applications**
- **Migrated** a large-scale OTT CMS from **Angular to React.js**, improving maintainability, performance, and scalability while enabling new feature development

Video Wall System

- Designed and developed a real-time Linux-based video wall system for monitoring **300+ live channels** with audio level tracking
- Built 20 monitoring grids with 16 live channels each, optimizing real-time rendering and monitoring workflows
- Delivered the solution independently from Proof of Concept (PoC) to Production deployment
- Worked on performance optimization and system reliability for continuous live-stream monitoring environments
- **Tech:** Python, Kivy | **Team Size:** 1

Streamer

- Developed a video streaming and **packaging platform supporting HLS, DASH, and DRM** workflows
- Built scalable backend APIs using **Node.js** and **MongoDB** alongside frontend features using **React.js**

EDUCATION

City Engineering College - Bachelor of Engineering

CGPA – 7.8

Aug 2018 – Aug 2022

VOLUNTARY SERVICES

GirlUp Gleam, United Nations Foundation - Content Writer

Jul 2020 – Sep 2022
